Mr. Kerry Packard, P.E.
Electric Service Engineer
Seattle City Light
1015 Third Avenue
Seattle, Washington 98104

Dear Mr. Packard:

Attached for your information is a report of dissolved gas analysis for the 26/4.16 KV master substation transformer. The Seattle City Light transformer was included in a plant-wide analysis of transformer condition by Transformer Consultants.

Please note that a very minor deterioration of the transformer oil was detected and a 6-month retest is recommended. Lone Star Industries will not be pursuing this transformer further.

Very truly yours,

Kenneth J. Rone, Jr.
Assistant Plant Manager
Engineering & Maintenance
